Allowable Subject Matter

This Office Action is in response to applicant's communication of 2/17/2009. Currently amended claims 26-38 are pending and in condition for allowance.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed method of injecting liquid under pressure to a patient comprising providing liquid under pressure and "when injection to the patient is desired to be stopped, closing the regulation system and the first occlusion system in such a manner that the first occlusion system closes when the pressure in the intermediate segment falls below an opening pressure of the first occlusion system..., so that part of said positive pressure is maintained in the intermediate segment while the pressure in the downstream segment is not maintained at such a positive pressure at least until the patient is disconnected from the tubing in order to direct leakage of fluid from the first occlusion system to the patient." The method including these steps and maintenance of pressures have not been found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
